Our ability to estimate, schedule, and manage enables us to routinely deliver beyond customer expectations. Powerwin Infra is more than a traditional electrical contractor. We manage projects in a manner unparalleled for a specialty contractor.

We at Powerwin Infra having separate IMC division and the maintaining below mentioned activities in various companies.

- High voltage systems – 11 kv and above
- Underground duct banks
- Switchgear and substations
- Transformers
- Raceways
- Conduit and cable tray
- High voltage terminations
- Medium and low voltage – 440V and down
- Power and control wiring
- DCS and PLC Instrumentation
- Break panels

- Cable Terminations
- Electrical tracing
- Fire alarm systems
- Communication systems
- Security
- Turnstiles
- Card readers
- AV systems
- Lighting

Nature of Electrical Maintenance Services: -

- Troubleshooting, Repairing, and Rebuilding, including servo motor repair
- Preventative and Predictive Maintenance
- Diagnostic services to industrial plants, steel and paper mills, power plants, utilities, and institutional and commercial buildings
- Servicing rotating electrical and mechanical equipment, Transformers, Pumps, Switchgear, Drives, and Electronics
- Laser Alignment
- Vibration Analysis and Online Monitoring
- Thermography / Infra-Red Scanning Services
- Balancing
- Circuit-Breaker Testing
- Field Rewinding
- Ultrasound Leak Detection
- Oil Analysis & Testing
- Crane Inspection
- Loading analysis
- Lighting maintenance
- Energy conservation
- Emergency services
- And many other services
